ELSEVIER J. Biochem. Biophys. Methods 34 (1997) 255–256

JOURNAL OF biochemical and biophysical methods

Contents of Volume 34

No. 1
Research Articles
G. Chinali (USA)
Isolation of tRNA isoacceptors by affinity chromatography with immobilized elongation factor Tu from *Escherichia coli* 1

J.J. Barchi Jr, L.-S. Jeong, M.A. Siddiqui, V.E. Marquez (USA)
Conformational analysis of the complete series of 2′ and 3′ monofluorinated dideoxyuridines 11

G.R. Lilley, M. Griffin, P.L.R. Bonner (UK)
Assays for the measurement of tissue transglutaminase (type II) mediated protein crosslinking via ϵ-(γ-glutamyl) lysine and N',N'-bis (γ-glutamyl) polyamine linkages using biotin labelled casein 31

E. Pinho Melo, M.R. Aires-Barros, S.M.B. Costa, J.M.S. Cabral (Portugal)
Thermal unfolding of proteins at high pH range studied by UV absorbance 45

C.S. Kingu, R. Wei (USA)
Alcohol dehydrogenase-catalyzed reduction of protein carbonyl derivatives 61

Short Communications
A. Burkovski (Germany)
Rapid detection of bacterial surface proteins using an enzyme-linked immunosorbent assay system 69

M.F. Shubsda, J. Goodisman, J.C. Dabrowiak (USA)
Quantitation of ethidium-stained closed circular DNA in agarose gels 73

Instructions to Authors 81

No. 2
Research Articles
A.V.S. Sarma, T.V. Raju, A.C. Kunwar (India)
NMR study of the peptide present in the principal neutralizing determinant (PND) of HIV-1 envelope glycoprotein gp120 83

E. Sau Man Po, J. W. Ho, B. Yi Gong (Hong Kong , People's Republic of China)
Simultaneous chromatographic analysis of eight fat-soluble vitamins in plasma 99

M.D. Noseworthy, E.G. Janzen, R.A. Towner, S. Yamashiro (Canada)
In vivo study of halothane hepatotoxicity in the rat using magnetic resonance imaging and ^{31}P spectroscopy 107

J. Grunwald, D. Marcus, Y. Papier, L. Raveh, Z. Pittel, Y. Ashani (Israel)
Large-scale purification and long-term stability of human butyrylcholinesterase: a potential bioscavenger drug 123

K. Thethi, P. Jurasz, A.J. MacDonald, A.D. Befus, S.F.P. Man, M. Duszyk (Canada)
Determination of cell surface charge by photometric titration 137

L. Kerkhof (USA)
Quantification of total RNA by ethidium bromide fluorescence may not accurately reflect the RNA mass 147

Short Communications
A. Rescigno, F. Sollai, A.C. Rinaldi, G. Soddu, E. Sanjust (Italy)
Polyphenol oxidase activity staining in polyacrylamide electrophoresis gels 155

K. Dill, J.H. Song, J.A. Blomdahl, J. D. Olson (USA)
Rapid, sensitive and specific detection of whole cells and spores using the light-addressable potentiometric sensor 161

No. 3
Research Articles
M. Yoshida, Y. Takakuwa (Japan)
Method for the simultaneous assay of initial velocities of lactate dehydrogenase isoenzymes following gel electrophoresis 167

R. Graves, R. Davies, P. Owen, M. Clynes, I. Cleary, G. O'Beirne (UK, Ireland)
An homogeneous assay for measuring the uptake and efflux of radiolabelled drugs in adherent cells 177

G. Bolte, M. Knauss, I. Metzdorf, M. Stern (Germany)
Dot blot chemiluminescence assay for studying food protein binding to small intestinal brush border membranes in vitro 189

J.P. Favier, D. Bicanic, P. Helander, M. van Iersel (The Netherlands, Sweden)
The optothermal approach to a real time monitoring of glucose content during fermentation by brewers' yeast 205

A.P. Heuck, R.A. Wolosiuk (Argentina)
Fluoresceinthiocarbamyl-insulin: A potential analytical tool for the assay of disulfide bond reduction 213

R. Horejsi, G. Kollenz, F. Dachs, H.M. Tillian, K. Schauenstein, E. Schauenstein, W. Steinschifter (Austria)
Interheavy disulfide bridge in immunoglobulin G (IgG) reacting with dithionitrobenzoateA unique feature in serum proteins 227

R.S. Komsa-Penkova, R.K. Rashap, V.M. Yomtova (Bulgaria, Lithuania)
Advantages of orange-labelled collagen and gelatine as substrates for rapid collagenase activity measurement 237
